

5-7 YARD DUMP BODY

Exclusive EX2 long sill rubber cushion insert reduces noise and adds frame protection.

FEATURES

- All extrusions are proprietary to Future Line Manufacturing, and T6061 aluminum alloy used as standard to deliver 100% corrosion resistance, increased strength, durability and longevity
- 5- to 7-yard capacity
- 9' to 14' body length
- 6 x 3/8" extruded rub rail and tailgate channels*
- 4 x 4 x 1/4" extruded top rail*
- Exclusive EX2 long sill rubber cushion insert adds frame protection while reducing vibration and noise*
- Crossmemberless
- Several hoist options
- One-piece floor
- One-piece smooth sides (straight or sloped)

BENEFITS

- All aluminum, no steel or hybrid
- Exclusive extruded top, side and tailgate channel*
- Underside stays clean and doesn't collect road and job site debris because of crossmemberless design, eliminating added weight*
- Lower center of gravity due to crossmemberless design that reduces mounting height by 4"*
- Increased durability from extruded long sill system*
- Exclusive EX2 rubber cushion provides vibration insulation resulting in a quieter ride and reduced wear and tear*
- Fuel savings from bodies that weigh 50% less than steel

4 X 4 X 1/4" EXTRUDED TOP RAIL

EX2 RUBBER ISOLATION

BODY OPTIONS

- Straight or sloped tailgate
- Two- or three-panel tailgate
- Included hoist options: pin-to-pin, trunnion, or underbody hoist
- Cab shields, 12-48", full or narrow, straight or tapered
- Coal chute
- Pre-installed cab shields, hoist, cradles, pins, blocks, tarps, and light systems.
- Floor liner
- Extruded floor and sides
